## Interplast – An Inspiring Project

Interplast Australia & New Zealand sends teams of volunteer surgeons, anaesthetists, nurses and allied therapists to developing countries in the Asia Pacific Region to provide free treatment and medical training.

### Treatment and Training

Interplast volunteers provide free treatment to people living with a disability from a congenital condition such as cleft lip and cleft palate or acquired conditions such as burns scar contractures. Treatment is targeted to indigent populations who would otherwise not be able to afford to access services. People living with a disability are among the most disadvantaged in the world. Many suffer from treatable deformities and injuries but are unable to access treatment due to poverty, isolation and the lack of surgeons skilled in plastic and reconstructive surgery. 70% of the patients of Interplast are under 15 years of age. Often these children are ostracised from their society simply because they look different, or cannot perform simple tasks for themselves. They often do not go to school because they are teased by their peers. They potentially live a life without friends, or an education and often are a continual burden on their family. A simple operation will repair their condition, and give them the confidence to attend school, restore functionality, and grow up to contribute economically to their family and ultimately the community in which they live.
